

RACHITH KUMAR SONTE

Hyderabad, India | +91 6302424692 | kumarrachith0@gmail.com | linkedin.com/in/rachithkumarsonte | github.com/orewaluffy10

PROFESSIONAL SUMMARY

Backend Software Developer (ASP.NET Core, C#, .NET Framework) with hands-on experience building AI/ML systems, including deep learning models (CNN, EfficientNet, BiLSTM), computer vision, and full-stack Python/Flask applications. Skilled in Python, SQL, C#, TensorFlow, and REST API development, with a track record of shipping backend services and end-to-end machine learning platforms from data pipeline to deployment.

TECHNICAL SKILLS

Languages: Python, Java, C++, C#, SQL, JavaScript

Backend & .NET: ASP.NET Core, .NET Framework, Entity Framework Core, Web API, REST APIs, JWT Authentication

AI / ML: TensorFlow, Keras, EfficientNet, BiLSTM, CNN, Scikit-learn, NLP, Computer Vision, OCR, Machine Learning, Deep Learning

Web & Data: Flask, REST APIs, HTML/CSS, MySQL, Pandas, NumPy, Matplotlib, Data Visualization, Database Management

Tools & Platforms: Qt Framework, Git, Jupyter, Google Colab, Arduino, IoT, Twilio API, Postman

EXPERIENCE

Software Developer — Backend (ASP.NET Core, C#) May 2025 – Present
ANSIT Portal | Hyderabad, India

- Develop and maintain backend services for ANSIT Portal using ASP.NET Core Web API, C#, .NET Framework, Entity Framework Core, and MySQL.
- Build REST APIs and business logic layers (repositories for Account, Daily Standup, Error Log, Master modules) consumed by an Angular frontend.
- Implement JWT-based authentication and CORS policies, and collaborate with frontend engineers on end-to-end feature delivery.

Software Engineering Intern — GUI & Systems Development, DRDO May 2023 – Nov 2023
Defence Research and Development Organisation | Hyderabad, India

- Built a real-time telemetry visualization GUI in C++ and Qt for aerospace systems, achieving sub-second latency data monitoring.
- Optimized the UI rendering pipeline and resolved critical system bottlenecks through performance tuning and reliability testing.
- Collaborated with senior engineers on system integration, feature development, and requirement analysis across the full SDLC.

PROJECTS

Servexa — AI Intelligent Electronic Service Orchestration Platform 2024 – 2025
Python, TensorFlow, EfficientNet, BiLSTM, OCR, Flask, MySQL

- Built an end-to-end AI-driven platform automating electronic product service management with ML-based issue classification and troubleshooting.
- Implemented a hybrid deep learning model (EfficientNet + BiLSTM with attention) and OCR-based warranty verification, eliminating manual processing.
- Engineered predictive spare-parts recommendation and technician allocation algorithms to optimize repair efficiency and minimize turnaround time.

Malaria Parasite Detection — Deep Learning Classification System 2025
Python, TensorFlow, CNN, EfficientNet, OpenCV, Flask

- Developed a CNN and EfficientNet-based system to classify infected vs. uninfected blood cell images using the NIH malaria dataset.
- Applied transfer learning, data augmentation, and fine-tuning to achieve high classification accuracy; deployed via Flask for real-time diagnosis support.

IoT Self-Driving Automated Car Prototype 2024
Python, Machine Learning, Arduino, IoT Sensors

- Developed an autonomous car prototype integrating ML-based navigation with IoT sensors for real-time obstacle detection and path planning.

EDUCATION

CMR Technical Campus, Medchal – Hyderabad — B.Tech in Data Science May 2024 – Present
TRR College of Technology, Meerpet – Hyderabad — Diploma, Computer Science Jun 2021 – Mar 2024

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Deep Learning, Database Management, Computer Vision, NLP, Software Engineering

CERTIFICATIONS

- Internship Completion Certificate – Aerospace GUI Development, DRDO (Nov 2023)
- 100 Days of Code: The Complete Python Pro Bootcamp – Udemy (Feb 2026)
- Algorithm Alchemy: Unlocking the Secrets of Machine Learning – Udemy (Apr 2026)
